EDUCATION

The University of Texas at Austin May 2021
Master of Science in Business Analytics — GPA: 3.96

The University of Texas at Austin May 2020
Bachelor of Science in Computer Science

TECHNICAL SKILLS

Languages: Python, Java, Kotlin, JavaScript, SQL, C++, R, Swift, C, Haskell, SAS

Frameworks: React, Spring Boot, PyTorch, TensorFlow, Spark, Pandas, NumPy, Scikit-learn, Django, GraphQL, Tableau, Gurobi

Infrastructure: AWS, Docker, Kubernetes, Terraform, CI/CD, Kafka, PostgreSQL, Redis, Elasticsearch, Datadog, ETL, DDL

Domains: Recommendation Systems, Search Ranking, Machine Learning, Deep Learning, LLMs, Generative AI, RAG, NLP, A/B Testing, System Design, Time Series

EXPERIENCE

Indeed — Austin, TX

Software Engineer II, Employer Recommendation Team July 2025 – Present

- Lead design and delivery of improvements to the employer-side recommendation retrieval system that surfaces qualified candidates for employer sourcing and the premium job experience.
- Drive data-driven A/B testing initiatives and resolve technical and operational debt through the DFR cycle to improve recommendation quality and system performance.

Software Engineer, Match Recommender Team May 2024 – June 2025

- Built and maintained Match Provider services that align job opportunities between job seekers and employers using machine learning models and production software engineering practices.
- Designed and shipped A/B experiments and analytics that improved recommendation quality for job seekers, reducing low-quality matches by 12%.
- Resolved technical and operational debt across the service through the DFR cycle.

Software Engineer, Ranking Capabilities Team August 2023 – May 2024

- Shipped duplicate-job collapsing in core Job Search, reducing redundant results shown to seekers and improving the quality of ranked listings.
- Maintained and improved systems and algorithms powering core job-search services.

Research Engineer / Associate Research Engineer, Search Quality Team August 2021 – July 2023

- Built and launched the GotAJob website with a team of four using React, Java, Terraform, and Datadog.
- Shipped new features for the Indeed Help Center and Contact form using React, Java, and A/B testing.

Dell — Capstone Project, EUC Ecosystem Team; Austin, TX November 2020 – May 2021

- Developed an automated customer-service chatbot using deep learning and NLP to streamline hardware configuration inquiries.
- Partnered with Dell stakeholders to define project scope and success criteria.

CDW — Data Science Intern; Lincolnshire, IL June 2020 – August 2020

- Built a clustering and predictive-modeling pipeline in Python that automated triage for 60,000+ sales and support inquiries, improving throughput by 50%.
- Presented data-driven recommendations weekly to management stakeholders.

TECHNICAL PROJECTS

Doodle Image Recognition (Kaggle Competition) Fall 2020

- Competed in a team of five on the “Quick, Draw! Doodle Recognition Challenge,” classifying drawings with CNN, ResNet, and MobileNet in TensorFlow to achieve 92.5% accuracy across 340 classes.

Airbnb Data Platform Fall 2020

- Built an end-to-end ETL pipeline with three transactional databases, an Oracle SQL data warehouse, and a Spark-based data lake to power business insights.

Spoken Languages: Chinese (native), English (fluent)
